

Physiotherapy Assistants working with CTGHG

Work under the supervision of a physiotherapist and as part of a team with clients and families of all ages whose lives have been affected by physical illness or injury, developmental delays, or the aging process. You provide assistance to the physiotherapist and follow-up on client programs related to mobility and transfers, musculoskeletal conditions, pain and inflammation, respiratory conditions and circulatory concerns which affect the clients ability to cope independently at home, school or in the community

The Physiotherapist Assistant title applies to a health worker who has completed their diploma at a college of applied arts and technology, that is, has graduated from a recognized physiotherapy assistant program, or rehabilitation assistant program.
