

Registered Dietitians (RDs) working with CTGHG

Work individually and as part of a team with clients and families of all ages. They focus their skills professional knowledge and expertise on optimizing client nutrition intake; promoting overall nutritional health and well being of clients and families. You will have the autonomy to manage your own caseload to meet the needs of your clients, as well as, giving you the flexibility to schedule your own day.

As a member of our inter-professional team you will, develop individualized home or school based programs to meet their nutritional needs. This may include teaching your clients, families, team members, school staff or caregivers about appropriate types of foods, portion sizes, or supplements. You will be assessing your clients for equipment and supplies related to their tube feedings, and teaching them, their families or other team members how to manage these in their home environment.

You will be involved in diabetic teaching with clients their families and/or other members of the inter- professional team to ensure adequate knowledge to manage the clients disease and minimize secondary complications.
